

Dear Account Verification Team,

I am Dirk Hornung a former theoretical physics Ph.D. student with passion for technology and computer science. Since the age of fourteen, I am daily programming. With every project, I try to learn new technologies. I have a huge inner drive in combination with an entrepreneurial spirit, which has lead to the creation of seven small companies during my time being. Currently, I want to build a career in one of the top tech companies, like Google.

Why Google?

Google is known to be cutting-edge. It has a tremendous reputation and a huge influence on my community. This summer I spend time studying distributed systems and artificial intelligence. I was surprised how Google is driving our ecosystem with technologies like Tensorflow, Google File System (Hadoop) and many more. Google should be the best place for me to grow. I would very much enjoy the company of skilled coworkers and a supportive team to solve challenges concerning Account Verification.

Why me?

I have the following qualifications relevant for a Full-Stack Engineer position:

- Experience working as Full-Stack Developer
- Solid foundation in computer science, algorithms and data structures
- Excellent analytical, troubleshooting and communication skills
- Experience programming in HTML, CSS, TypeScript, Python and C++
- Quick and motivated learner

I am convinced that my strong background in computer science, together with my motivation and communication skills would be of great value to Google.

Best regards,
Dr. Dirk Hornung
